Net revenues for the second quarter were a record \$317.7 million, a 69% increase, as compared to net revenues of \$188.2 million reported for the same quarter last fiscal year. Net income for the second fiscal quarter was \$0.7 million, or break-even earnings per share, as compared to a net loss of \$24.3 million, or a loss per share of \$0.09 reported for the second quarter of last fiscal year. Excluding the impact of expenses related to equity-based compensation, the company had net income of \$4.9 million and earnings per diluted share of \$0.02 for the second quarter. This compares to a net loss of \$21.3 million and a loss per share of \$0.08, excluding the impact of expenses related to equity-based compensation for the second quarter of last fiscal year.

Net revenues for the six-month period ended September 30, 2007 were \$813.2 million, as compared to net revenues of \$376.2 million reported for the six-month period of last fiscal year. Net income for the first six months was \$28.5 million, or earnings per diluted share of \$0.09, as compared with a net loss of \$42.6 million, or a loss per share of \$0.15, reported for the same period last fiscal year. Excluding the impact of expenses related to equity-based compensation, the company had net income of \$37.7 million and earnings per diluted share of \$0.12 for the first six months of fiscal 2008. This compares to a net loss of \$36.1 million and a loss per share of \$0.13, excluding the impact of expenses related to equity-based compensation for the six-month period of last fiscal year.

Robert Kotick, Chairman and CEO of Activision, stated, "Our second quarter net revenues were the highest in our company's history and we ended the quarter with \$962 million in cash and short-term investments. We significantly strengthened our development capabilities through our acquisition of Bizarre Creations, a proven top-tier developer of racing games which will facilitate our entry into this important segment."

Kotick continued, "During Q3, we shipped more units of our internally developed, wholly owned franchise, Guitar Hero III(R): Legends of Rock, than any other game in Activision's history. Within the first seven days, consumer sell through was more than \$100 million in North America alone -- our largest product launch ever. Our third-quarter slate is expected to deliver our strongest quarterly results to date, with forecasted net revenues in excess of \$1 billion. The eagerly anticipated Call of Duty 4 (TM): Modern Warfare(TM) will launch tomorrow, and all of our holiday titles in North America will be in retail distribution by midweek. We are continuing to leverage our strong portfolio of franchises across key geographies and gaming platforms. As a result of our strong performance in the first six months of the fiscal year, and our solid third quarter release slate, we are raising our fiscal year 2008 net revenues and earnings outlook."

During the second quarter, Activision released three titles -- one title worldwide, Guitar Hero(TM) Encore: Rocks the 80s(TM) on the PlayStation(R) 2 computer entertainment system from Sony, and two titles in Europe -- TRANSFORMERS: The Game on the Xbox 360(TM) video game and entertainment system from Microsoft, PLAYSTATION(R)3 computer entertainment system from Sony, Wii(TM) home video game system from Nintendo, PlayStation 2 computer entertainment system, PC, and the Nintendo DS(TM); and the online multiplayer game Enemy Territory: Quake Wars on the PC.

Non-GAAP Financial Measures

Activision provides net income (loss) and earnings (loss) per share data both including (in accordance with GAAP) and excluding (non-GAAP) the impact of expenses related to employee stock options, employee stock purchase plans, restricted stock rights and other equity-based compensation and the associated tax benefits.

Prior to April 1, 2006, Activision accounted for equity-based compensation under the Accounting Principles Board, Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB No. 25"). In accordance with the APB No. 25, the company historically used the intrinsic value method to account for equity-based compensation. Beginning on April 1, 2006, the company has accounted for equity-based compensation using the fair value method under the Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment" ("FAS 123(R)").

Net income (loss) and earnings (loss) per share, excluding (in both cases) the impact of expenses related to equity-based compensation, are not determined in accordance with generally accepted accounting principles (GAAP), and the exclusion of those amounts has the effect of increasing non-GAAP net income and non-GAAP earnings per share (and reducing non-GAAP net loss and non-GAAP loss per share) by the same amounts as compared with GAAP net income (loss) and GAAP earnings (loss) per share for the period. Activision recognizes that there are limitations associated with the use of these non-GAAP financial measures as they do not reflect net income (loss) and earnings (loss) per share results as determined in accordance with GAAP, and may reduce comparability with other companies that calculate similar non-GAAP measures differently. Management compensates for the limitations resulting from the exclusion of expenses related to equity-based compensation by considering the amount and impact of these expenses separately and by considering the company's GAAP as well as non-GAAP results and, in this release, by presenting the most comparable GAAP measures, net income (loss) and earnings (loss) per share, directly ahead of non-GAAP net income (loss) and non-GAAP earnings (loss) per share, and by providing a reconciliation in the accompanying table that shows and describes the adjustments made. Management does not believe the limitations resulting from the exclusion of these expenses are material, particularly when this non-GAAP financial measure is disclosed with its most comparable GAAP financial measure, net income (loss), and earnings (loss) per share. Management believes that the presentation of these non-GAAP financial measures provide investors with additional useful information to measure the company's financial performance because they allow for a better comparison of results in the periods reported herein to those in historical periods. Internally, management uses these non-GAAP financial measures in assessing the

company's operating results, as well as in planning and forecasting.

These non-GAAP financial measures should be considered in addition to, not as a substitute for or superior to, financial measures determined in accordance with GAAP. Non-GAAP net income (loss) and non-GAAP earnings (loss) per share do not include the impact of certain expenses required to be recorded in order to present net income (loss) and earnings (loss) per share in accordance with GAAP. These non-GAAP financial measures are not based on a comprehensive set of accounting rules or principles, and the terms non-GAAP net income (loss) and non-GAAP earnings (loss) per share do not have a standardized meaning. Therefore, other companies may use the same, or similarly named measures, but exclude different items, which may not provide investors a comparable view of the company's performance in relation to other companies in the same industry.
